# UNINSTALLING WINSALTS32

## (You may need your System Administrator's assistance)

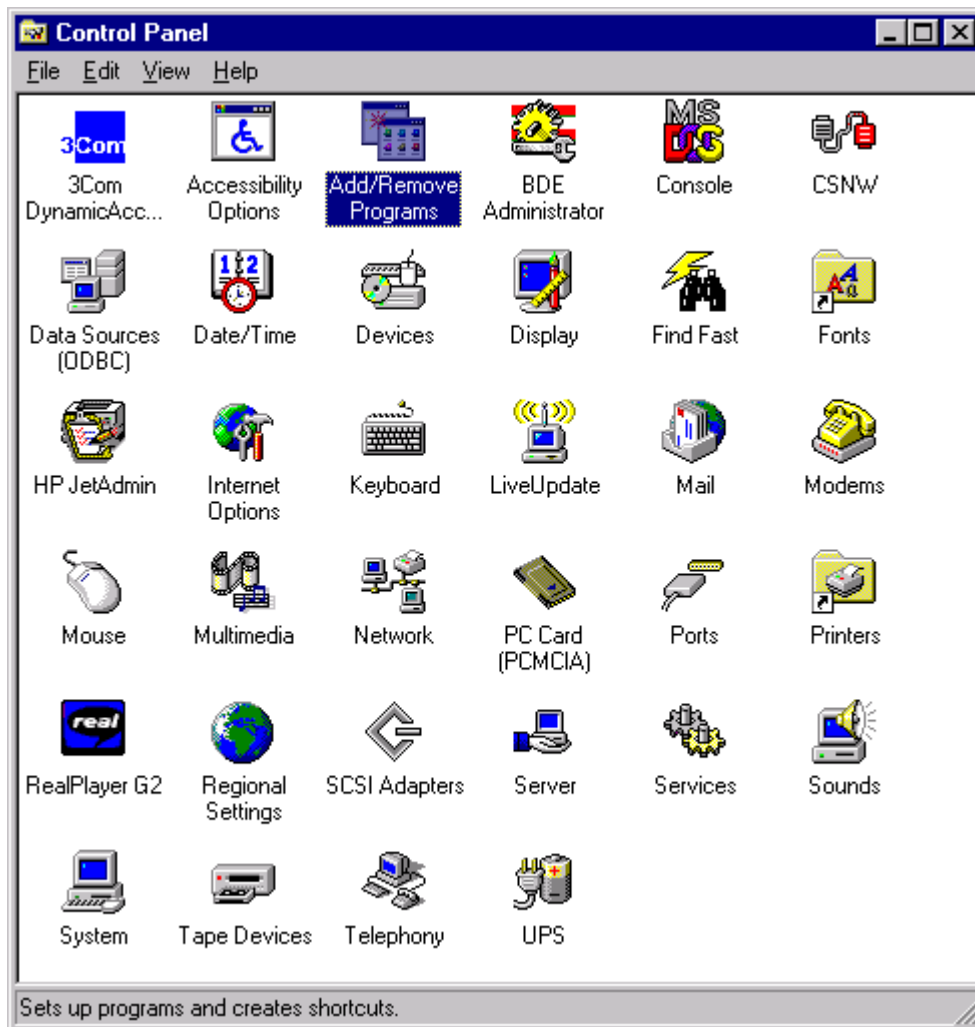

These procedures should be followed in case you need to completely remove WINSALTS 32 from your PC. Never simply delete files and directories, as this will render the program useless, but will not remove the registry entries contained in your PC.

Step 1: From your Windows Desktop, CLICK on the START Button on the lower left portion of the screen, then move the mouse up to the SETTINGS menu, then move the mouse to the right, and CLICK on the CONTROL PANEL item:

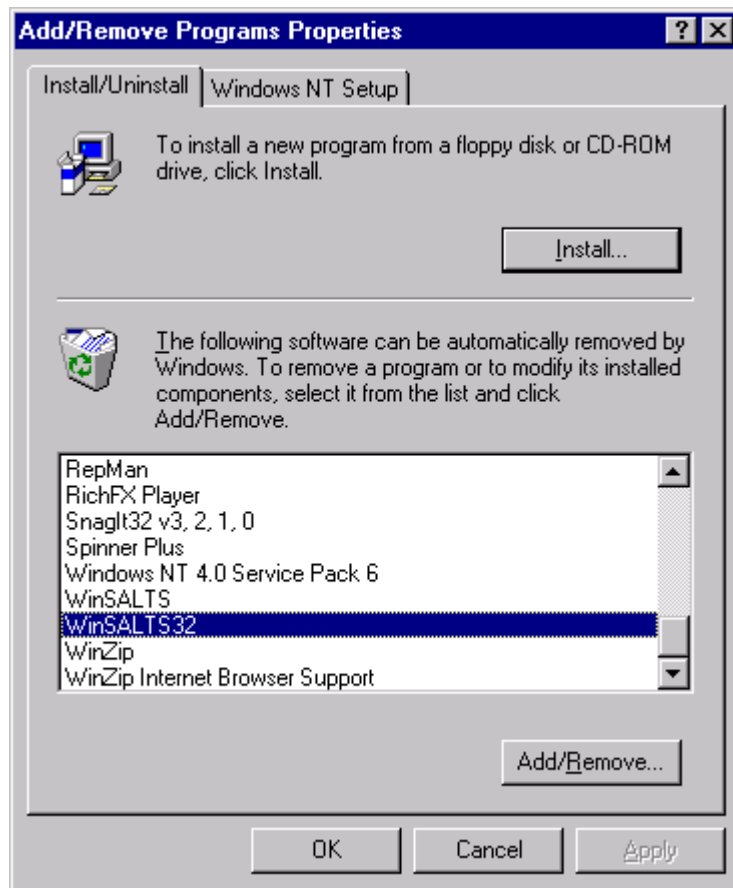

From here, the CONTROL PANEL menu window will appear.

Next, DOUBLE CLICK on the ADD/REMOVE PROGRAMS ICON (NOTE: If this option does not appear, you will need your System Administrators assistance)

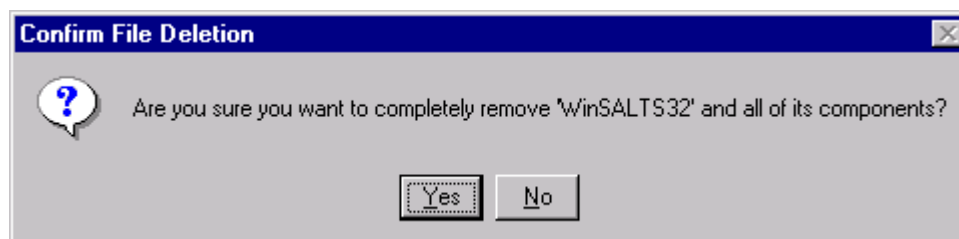

Once the ADD/REMOVE PROGRAMS ICON is selected, the ADD/REMOVE PROGRAMS PROPERTIES Menu will appear.

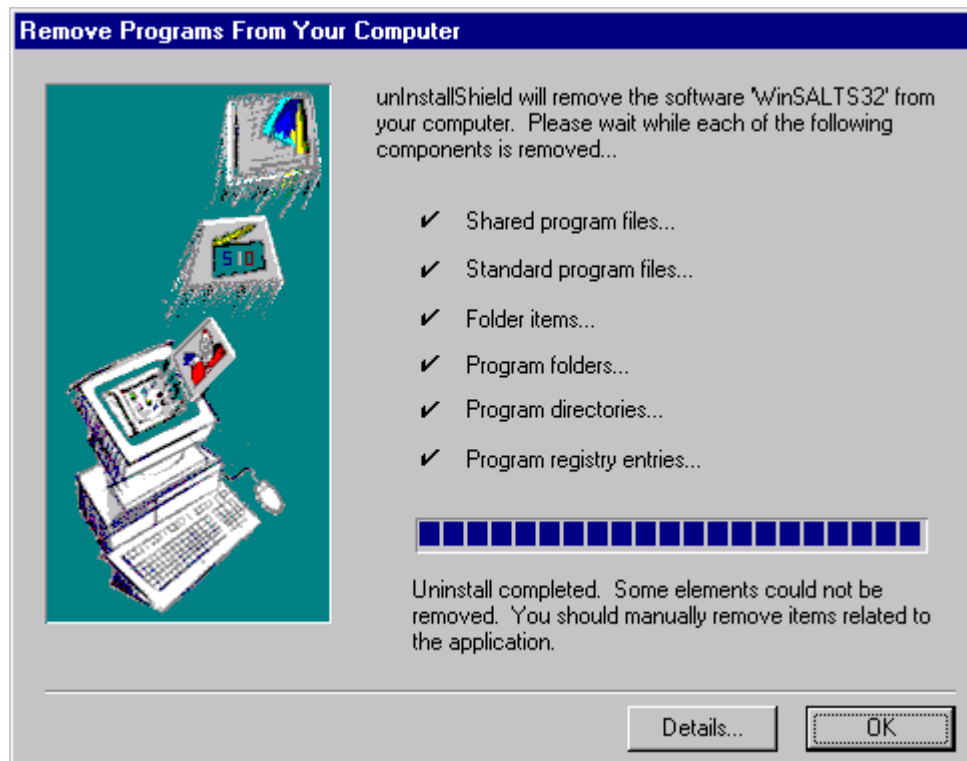

You need to scroll down and select the WINSALTS32 item, then CLICK the ADD/REMOVE Button:

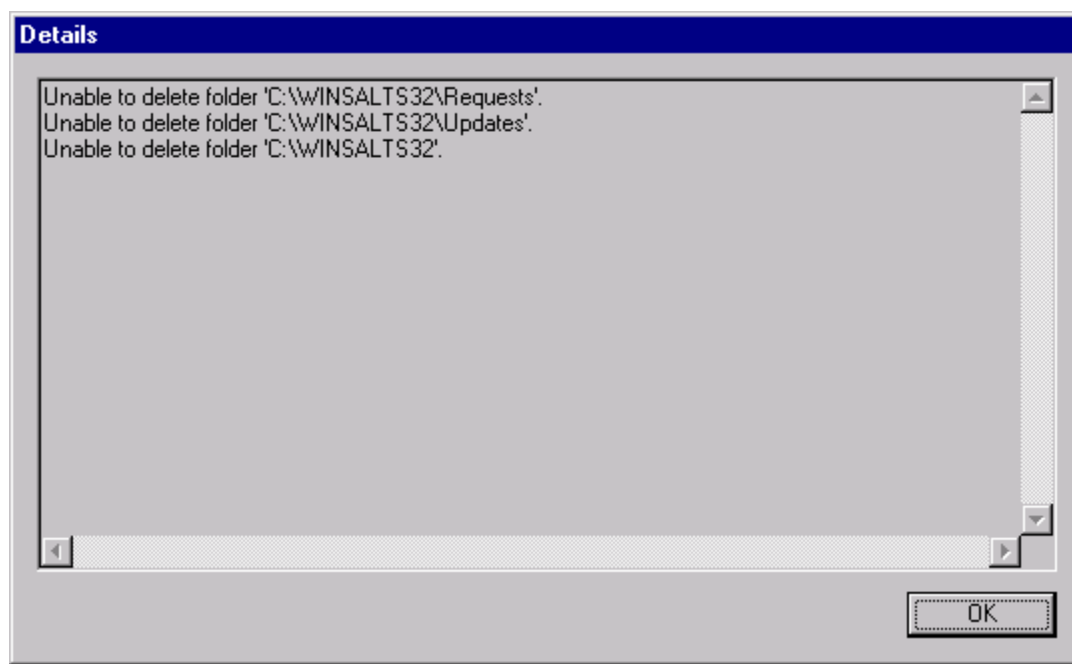

This will begin the removal process. You will receive this message, and can CLICK on YES to continue:

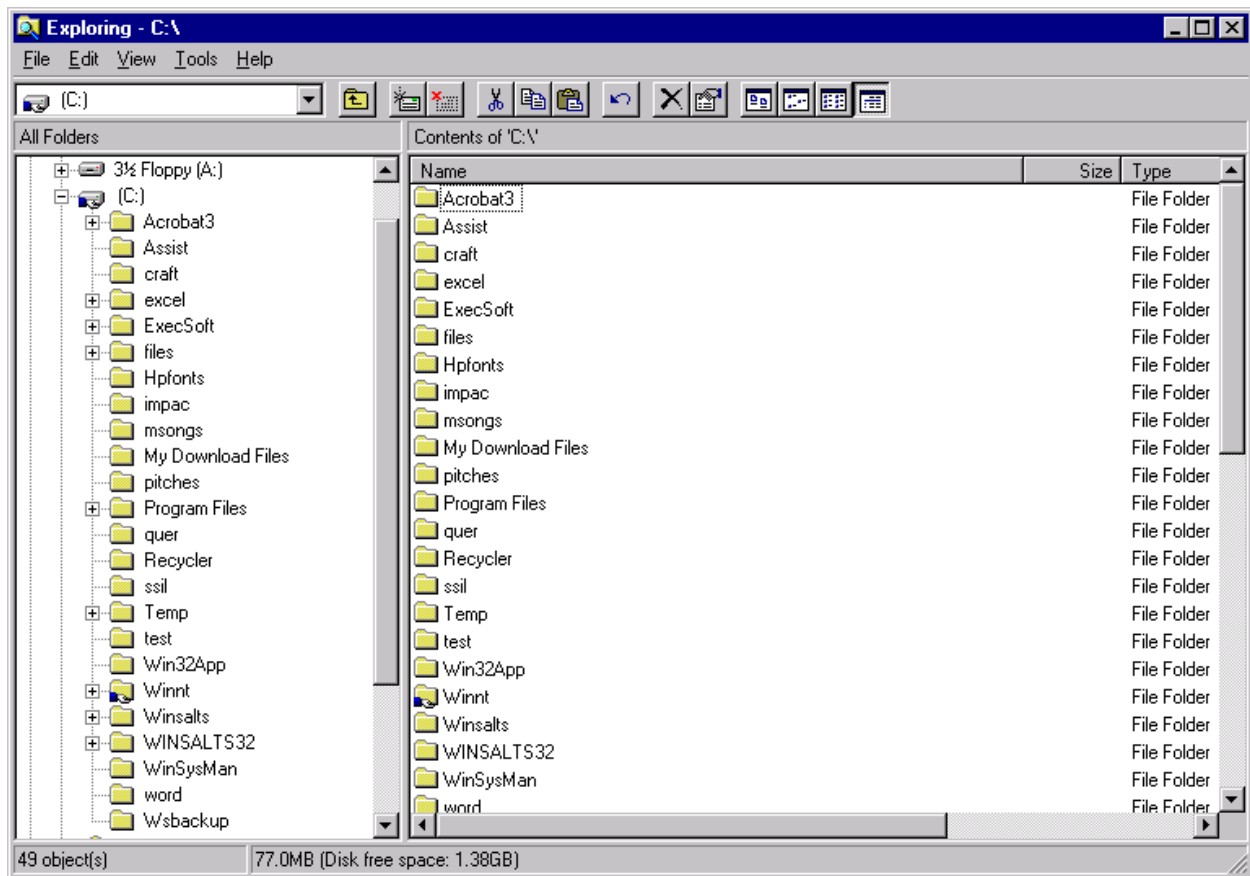

Once the Uninstall has completed, you will receive the following screen:

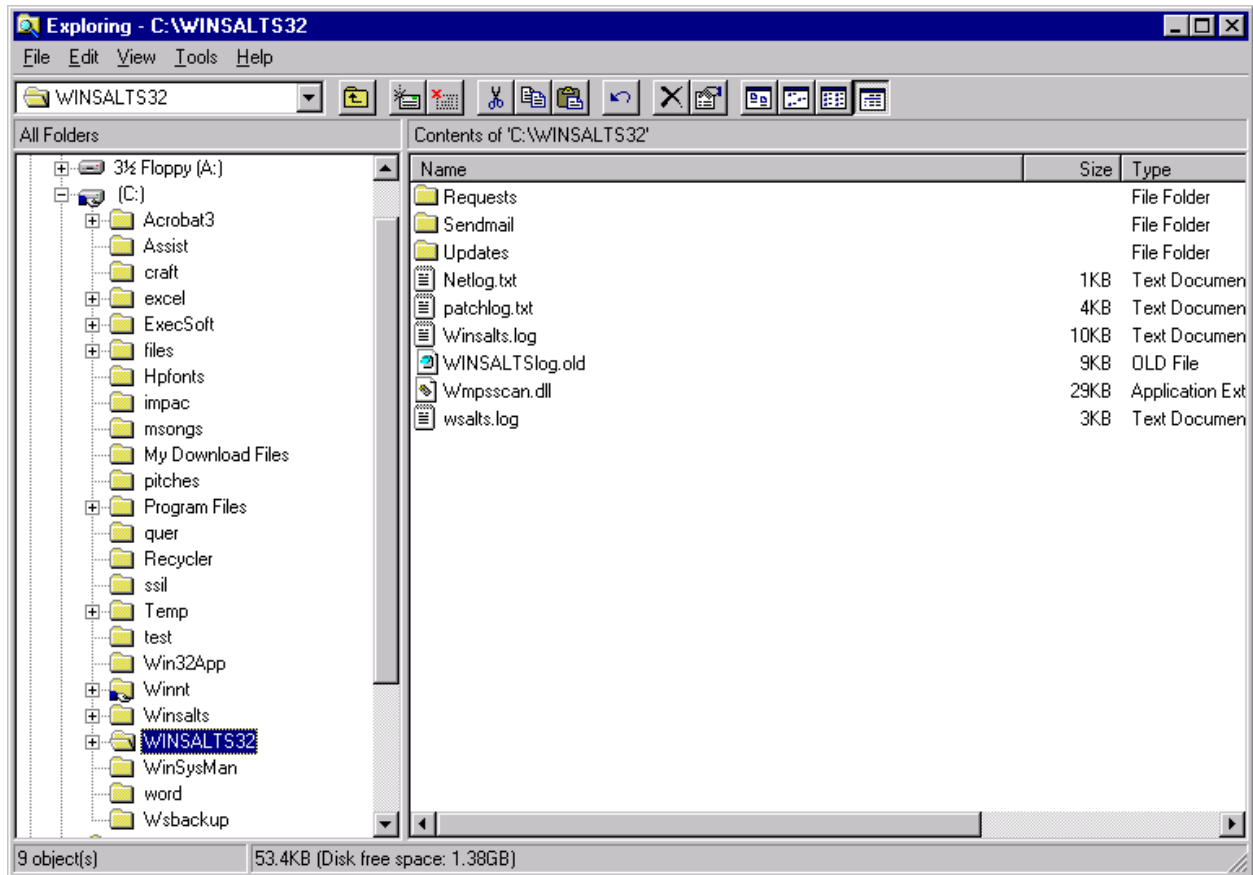

At this point, all files/directories that have been created/installed by WINSALTS have been removed, along with their corresponding Registry entries. You need to now **CLICK** on the **DETAILS** button, to list the files and directories that were not deleted. These files/directories must be **MANUALLY** deleted through the Windows Explorer (or by using your MS-DOS prompt if desired). **CLICK** **OK** to continue.

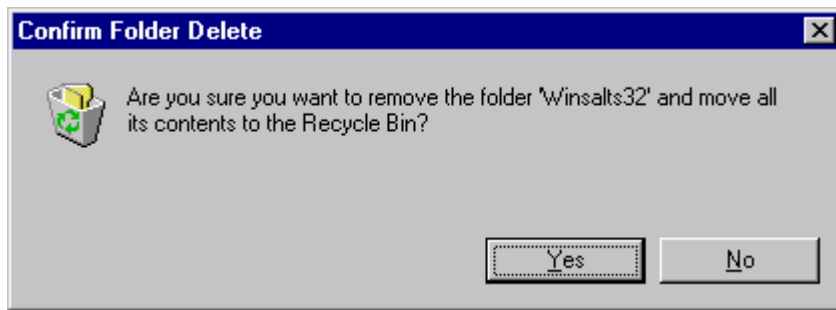

Go to Windows Explorer (there should be an ICON for this on your desktop, if not, CLICK the START button at the bottom left portion of your screen, scroll up to PROGRAMS, then over to the right, selecting WINDOWS EXPLORER:

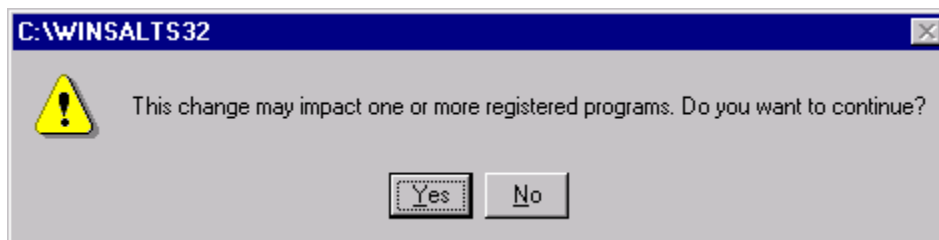

CLICK on the WINSALTS 32 directory once (the directory will be highlighted):

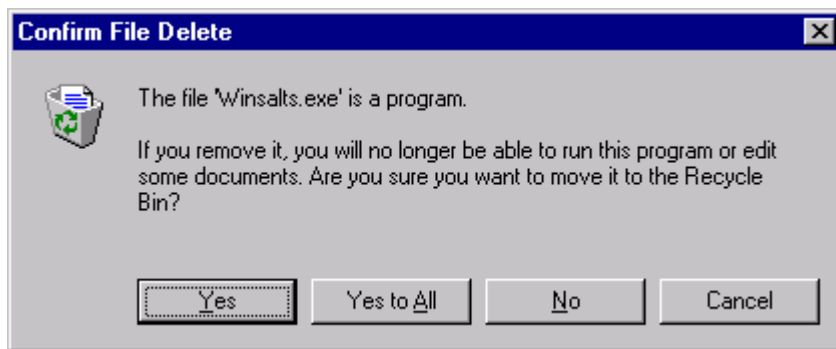

Next, select FILE, then DELETE. The following splash screen appears:

Answer YES. Then, this screen appears:

Answer YES. Finally, this screen will appear:

Answer YES TO ALL. WINSALTS32 is now removed.
